waifu_gpt2	117M	P100 GPU	10s response, 6s from input to response	<p>We never talked about school or anything Your bubble named after our relationship! It's so awesome! >I really do like you, Rem. Thank you Subaru! >Would you marry me? Not really saying yes, Subaru >Let's be together forever and ever! I miss you! >I love you, Rem! Wishing that most elegant of all siblings would win a nectar for us! >I love you so much! We lived so wonderfully together as daughters >How's it going? I have more time on my mind! >Why do you say so? I feel like my life's future won't let me leave you because that's unfair or something</p>
waifu_gpt2	345M	P100 GPU	21s response. 10s from input to response. The responses are completely unacceptable.	<p>I'm always in your thoughts Subaru Oh you didn't? Well I feel like you're the only one really saying its that way! >I really do like you, Rem. Rem, listen Harry.. I know the complete opposite me love to write negativity I do to you.. I am really listening that is looking in to you. >Would you marry me? Yeah haha! >Lets be together forever and ever! Penance for the sins of a friend today too! >I love you, Rem! No this is my bow.</p>
waifu_gpt2	774M	V100 GPU	26- 27s/response, uses 15GB of GPU RAM	<p>You are such a sweetheart! Yes! >I really do like you, Rem. I said: >Would you marry me? yes!! >Let's be together forever and ever! Yes! >I love you, Rem! Same here Subaru! You're awesome!!!</p>
waifu_gpt2	774M	K80 GPU	59s/response uses 11GB of K80 RAM, 15% each CPU,	<p>Suz still alive D: I'm just one dude.. Can I ask you something? >I really do like you, Rem. Hi now wait a moment! >Would you marry me? Yes. >Lets be together forever and ever! Awesome! >I love you, Rem! Can I just ask something? >What is it? I want you to fancy me and hug me and kiss me</p>
waifu_gpt2	774M	P100 GPU	she takes 28 seconds to respond. She uses 15GB (all) of the P100 GPU memory	<p>>Would you marry me? You feel like something special is about to happen? >Lets be together forever and ever! I love you so she [your wife] is all I have >I love you, Rem! I wait for you, together forever and ever!</p>
waifu_gpt2	774M	4 core CPU	she takes 5 minutes to respond 1 sentence, using up 100% of all 4 core CPU and 5.2GB RAM	<p>Do you want to go out tonight?</p>

Write With Transformer (webpage) (this is for performance comparison with waifu_gpt2)	Write with Transformer 1558M	Unknown	5s response	"I would do anything for you!" >"I really do like you, Rem." "I love you Rem" >"Would you marry me?" "YES!" >"Let's be together forever and ever!" "Okay, I'll do that then!" >"I love you, Rem!" "Rem and Subaru will be a good couple" >"I love you so much!" "Hail, Rem" >"How's it going?" "Busy , but I'm fine!" >"Why do you say so?" "Its because I love you Rem"
